Microsoft Dynamics GP provides growing businesses with tools that help them operate more efficiently.

Go Beyond the Basics with Microsoft Dynamics GP

Is your business bogged down by manual processes and a lack of visibility?

Are communication breakdowns and workflow issues affecting productivity and frustrating your staff?

Your existing systems may have worked great when you first started out. Now that your business is expanding, they may be holding you back.

Regain control with Microsoft Dynamics GP, the proven enterprise resource planning system used by more than 45,000 businesses worldwide. Featuring powerful tools that help you operate more efficiently, Dynamics GP also lets you scale up easily as your business grows.

Multiple Deployment Options – On-premises or in the cloud? The choice is all yours.

Microsoft Dynamics GP helps you automate processes, see real-time results, and run up-to-the-minute financial reports.

- **Centralized Control** – Fuel productivity and teamwork with a fully integrated, centralized system comprising financials, reporting & BI, supply chain, manufacturing, project management and human resources.

- **Automated Processes** – Built-in workflows help teams operate quickly and accurately with fewer steps for routine tasks. Get more done in less time.

- **Up-to-the-Minute Visibility** – Easy-to-use query functions and detailed reports provide live, accurate data that help you make the right decisions at the right time.

- **Rapid Reporting** - Speed planning with more than 220 reports that can be refreshed instantly. Real-time financial reporting delivers the business intelligence you need to keep your business moving forward.

- **Transaction Tracking** – Every action can be tracked to help you comply with local or federal regulations and validation requirements specific to your business. Easy access to transaction histories, lot numbers, date / time stamps and more.

- **Simple Scaling** – Scale up your business quickly and easily. Start with what you need now, then simply add more capabilities and users as you grow.

Microsoft

Partnering With Purpose

At FMT Consultants our purpose is to inspire greatness through technology. Our in-house team of Dynamics GP gurus takes the time to analyze and understand your business. This enables us to design and implement a solution that's aligned with your unique business needs and opportunities. By optimizing your processes, we help make your business nimble, efficient and more profitable.

We ensure that you work with the same team members as often as possible, and with those who have the greatest familiarity with your industry and system environment.

- **Experience** - Over 2,000 successful project implementations since 1995.

- **Customer Service** - 80+ in-house technology, accounting, solutions and customer care experts dedicated to serve your needs.

- **Innovation** - Ability to customize and tailor Dynamics GP to meet your unique needs and challenges.

- **Cross-Functional Expertise** - Extensive experience with system integration, custom development and migration.

- **Industry Knowledge** - Experience in a wide array of industries including distribution, manufacturing, finance, professional services, life sciences, healthcare and public administration.

Case Study: Better Processes Spur Growth

An aging accounting system limited ISIS Pharmaceuticals' ability to effectively manage budgeting, purchasing, accounting and compliance processes.

To help, FMT Consultants implemented Microsoft Dynamics GP. Now ISIS Pharmaceuticals obtains more accurate, timely and transparent expense reporting. It also has assurance that its operations comply with the necessary FDA validation requirements.

Ask us for the full case study.

> "FMT's level of service led me to wonder if ISIS was its only customer! We have always felt like a top priority when working with FMT's team, and we have the utmost confidence in their technical and industry knowledge."
